Forecast for Monday 22 Apr 2024

Weather: Dry during the very early hours of the morning with a chance of some bright skies as the sun rises though widespread areas of high cloud. Otherwise, generally a cloudy day with cloud bases lowering quickly through the morning as patchy rain and drizzle approaches from north of the park. Cloud low at times leading to some patchy fog across peaks and upslope regions where there is a chance of more prolonged spells of rain. Feeling much cooler too compared with Saturday.

Chance of cloud-free hill tops above 600m: 50% during the very early hours but quickly lowering to 20%.

Low cloud and visibility: Extensive low cloud as outbreaks of rain and drizzle spread across the park. Visibility good in drier spells, otherwise moderate to poor in precipitation and amongst upslope low cloud.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Low cloud will create poor visibility at times if hiking as well as drizzly outbreaks, creating slippery pathways across the park.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
14:00 on Sat 20 Apr 2024	0mm	0.2mm	0.2mm

Forecast for Tuesday 23 Apr 2024

Weather: Low cloud to start, perhaps bringing some hill fog and the odd spot of rain and drizzle. Conditions generally improving quickly through the morning, leaving a dry day with light winds. Any cloud generally with high bases with sunshine breaking through at times leaving a pleasant afternoon. Feeling cool, particularly across high peaks.

Maximum wind: North to northeasterly winds, 10-15 mph gusting 20-25 mph.

Chance of cloud-free hill tops above 600m: 20% during the very early hours, quickly rising to 90%.

Low cloud and visibility: Low cloud with bases around 400-500m to start with hill fog possible across lower upslope regions too. Poor visibility within low cloud and drizzly outbreaks. This clearing quickly through the morning leaving little to no low cloud and excellent visibility for scenic outlooks.

Temperature: **Valleys:** Plus 3 Celsius rising to plus 10 Celsius.
At 600m: Minus 2 Celsius rising to plus 5 Celsius.
Freezing level: Above summits.
